## GQ50 Rebar Cutting Machine

### 1) Production:

GQ50 rebar cutting machine is an ideal equipment for steel bar cutting. It can be applied to cut the normal carbon steel rod, hot rolled steel and deformed bar in machine processing and construction projects, also suit for square steel and flat steel.

### 2) Main Features:

- 1.Enhanced machine rack, small volume, compact structure, solid and reliable.
- 2.Good lubricating property, adopt enclosed gear box, use the gear splashing to realize lubrication. It could be continuous work two months after adding 8kg gear oil.
- 3.Less function loss because of the lubrication improvement. The gear section adopts rolling bearing, less resistance. Compared with same type cutting machine, load power can be reduced by one third.

4. Using high rigid cutting head, connecting rod and high speed national standard motor, guaranteed a more stable quality and longer service life.

Cutting Range	Plain Carbon Steel	Φ6- Φ 50mm	Motor Power	4KW
	Grade II Deformed Bar	≤Φ42mm	Voltage	380V
	Max Flat Steel	80*18mm	Motor Speed	2880r/min
	Max Square Steel	40*40mm	Weight	640kg±5kg
	Max Angle Steel	63*63mm	Dimension	1280*480*740
	Punching Frequency	28times/min
