STP200A/12V.R Plating rectifier with IGBT module

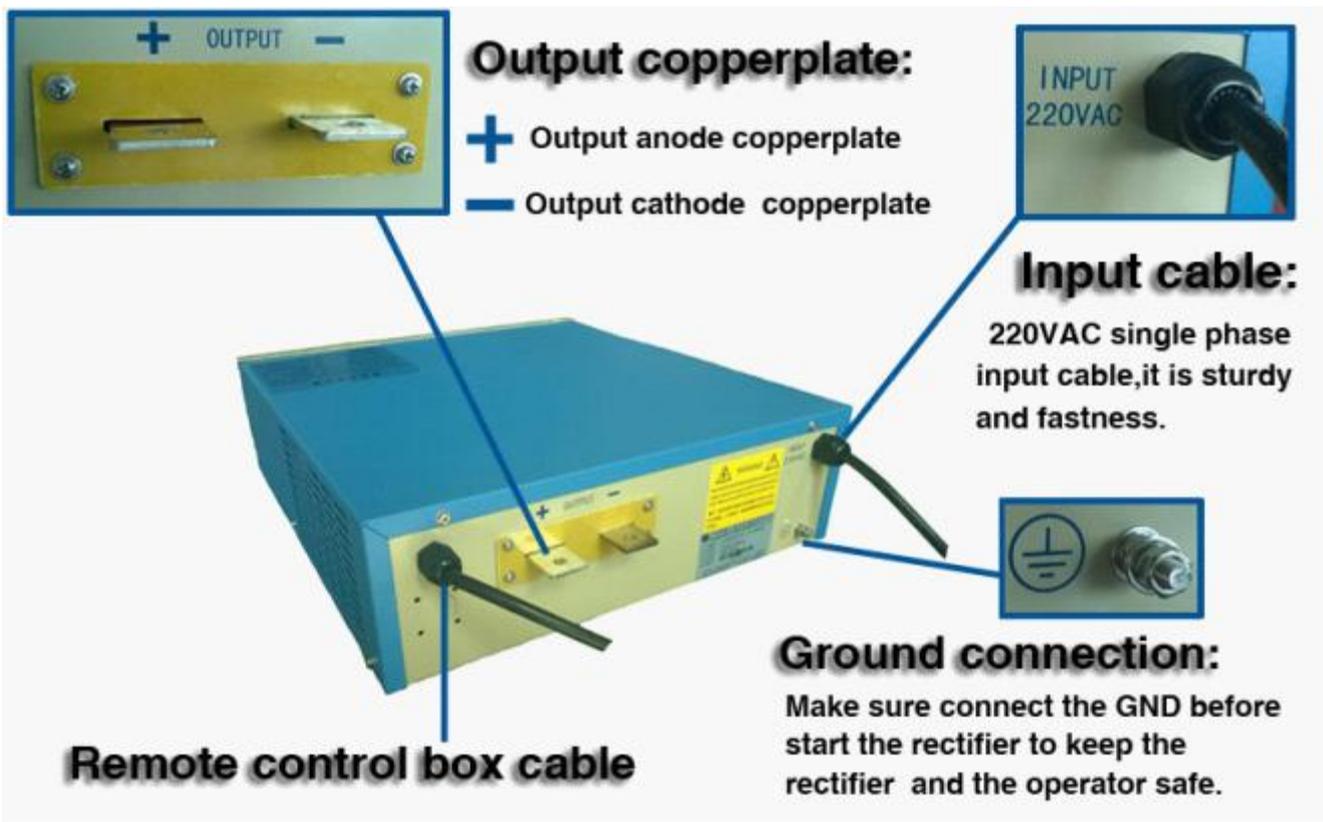

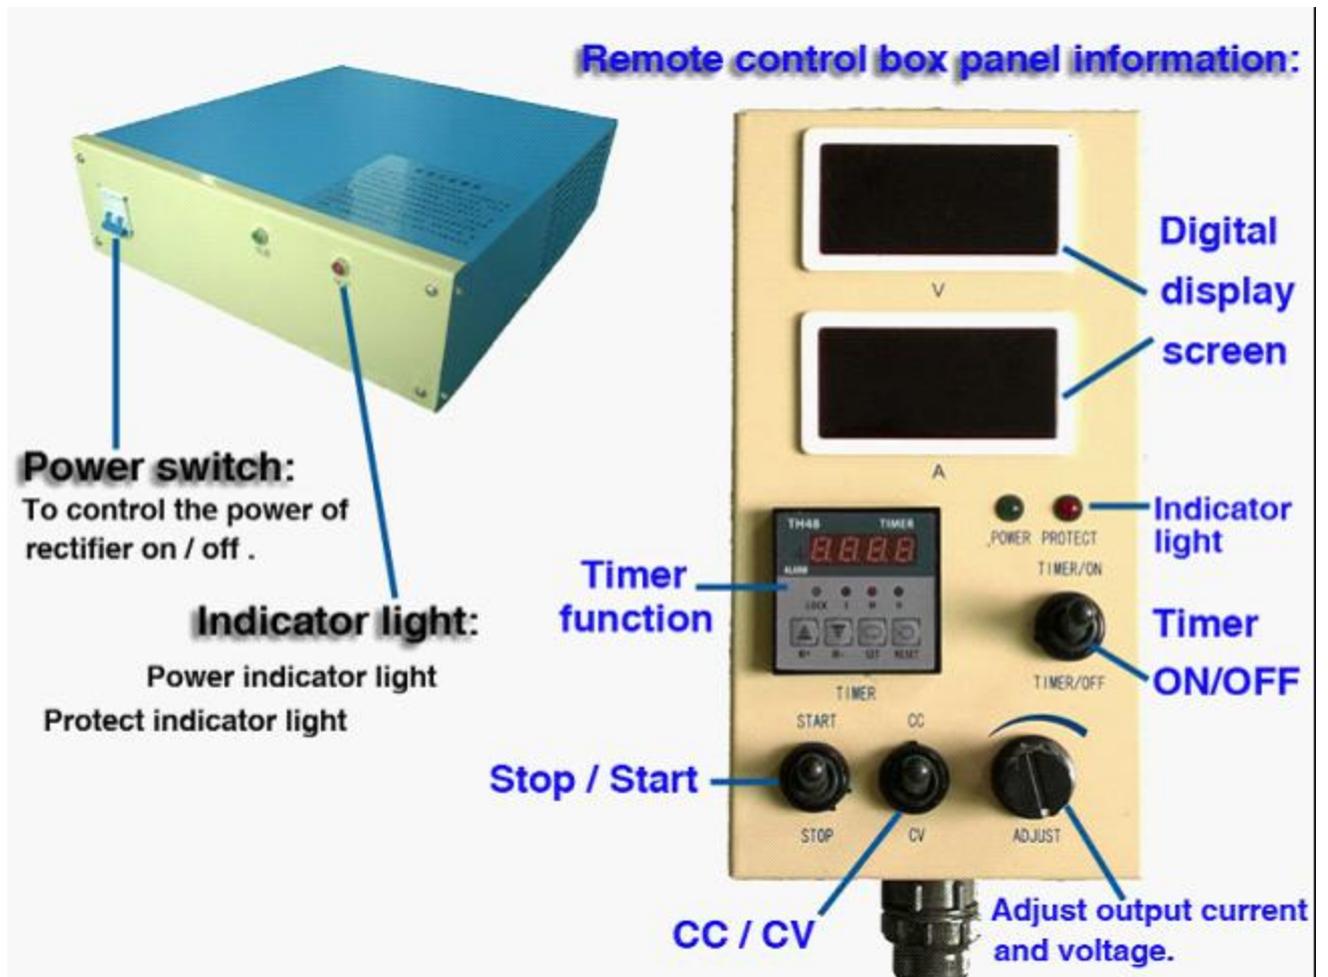

Size: 460mm(L)×150mm (H)×430 mm (W)

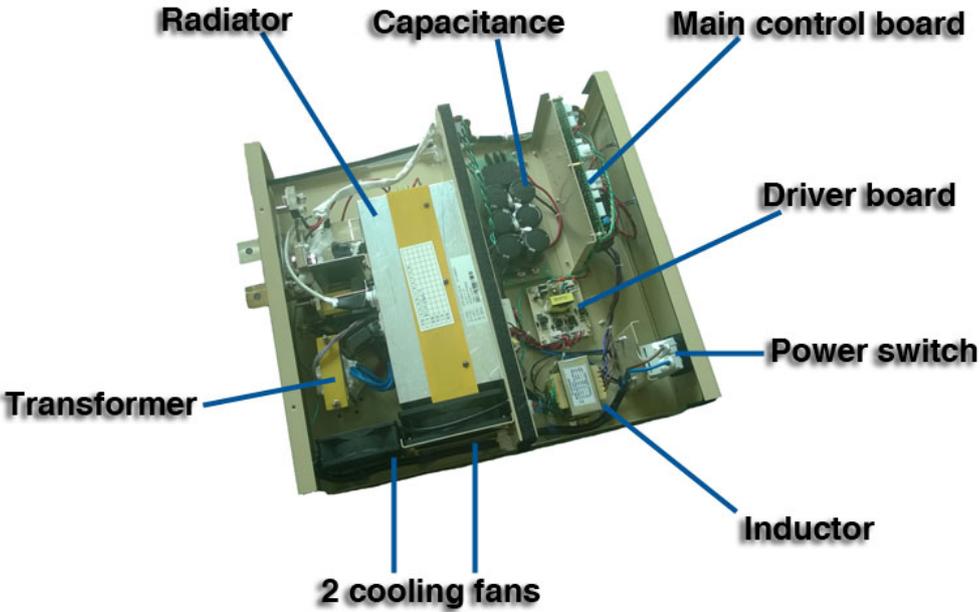

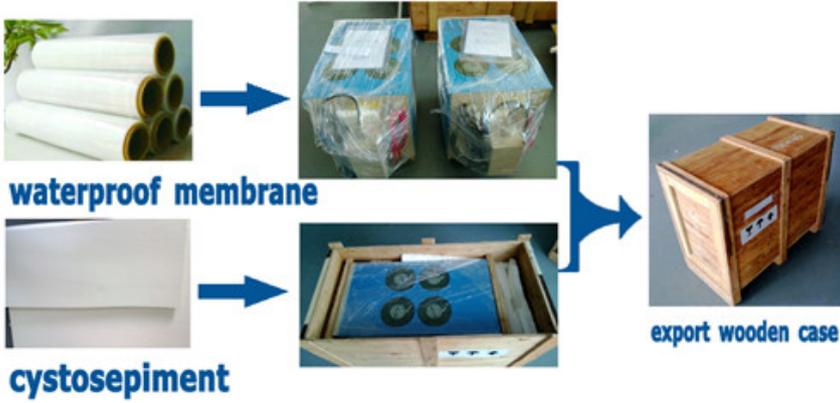

Specification:

Input voltage	220VAC \pm 10% (three phase) 60Hz
Output Voltage	0 - 12V adjustable
Output Current	0 - 200A adjustable
Output current stability	\leq 2%
Output voltage stability	\leq 1%
Efficiency	\geq 85%
Power factor	\geq 0.9
Ripple	\leq 3%
Start-up postponing time	\leq 10s
Inverting frequency	18kHz \pm 2kHz 8kHz \pm 2kHz
Remote control	Voltage and current display, start/stop,indicator light of protect and power , adjustment of output value, CC/CV,timer.
Remote control box cable	10meters (optional)
Signal interface	RS485
Modulation mode	PWM control
Complete protection functions	over current,over voltage,over heat ,short circuit,phase lack ,input undercurrent protection,over temperature,diode defect.
Product features:	1. Small size, light weight, high efficiency, high control precision. 2. High –frequency pulse current output, Suitable for plating small sized no-ferrous metal and alloy work pieces, it has high enetration ability, strong adhesive force, and can effectively enhance the brightness of the plated surface. 3. Output voltage and current can be adjusted, limiting voltage and current can be adjusted,greatly enhance application flexibility of the product for users. 4. With complete protection functions, over current, over heat rotection functions. High power factor, less pollution to the electric network, no interference
Scope of application	It is special for acidic copper, alkaline copper, multi-layer nickel, Chrome , copper,zinc , gold ,silver ,

indium, rhodium, tin, lead, anodizing, electrolysis degreasing, and single or double-clad plated printing process.

Panel Configuration:

<p>Remote control box</p>	
<p>IGBT module:</p>

<p>Ageing zone:</p>	

Our service:

1. More quantity allow some discounts and we can provide some spare parts together with the rectifier orders for you as future replacement, our warranty is 1 year, within the first year, if you need any spare parts for replacement, we can provide to you without paid. And we will offer lifelong technical support and service.

2. Our company is 9 year Alibaba Gold Supplier. On May 28 2013, our company public listing in Tianjin equity exchange, and the stock code is : 044006 . Good reputation is the guarantee of our cooperation.

3. All the PCB (main control board, driver card, etc), Transformer, inductor, heat dissipator are manufacturing by our factory, so we can confirm the lowest material cost and give customer the highest quality and reasonable price.

4. Support of after sales services: Customers can purchase many spare parts from us with much lower price, for the reason that many spare parts are making by ourself and we only sell you a material cost, so as to support your repair work strongly.

Our company :
